RECOMMENDATION FOR AN UPDATED 2008 WASTE TRANSPORTATION STUDY

Ref: January 16, 2008, Community Advisory Board for Nevada Test Site Programs (CAB) Ltr
subject as above

The U.S. Department of Energy Nevada Site Office wishes to acknowledge receipt of the above referenced letter recommending an update of the current waste transportation study of the southern routes utilized to transport low level and mixed low level waste to the Nevada Test Site.

As discussed during the teleconference on November 27, 2007, the next step in the process will be determining whether sufficient funds are available to complete this task during the current fiscal year. My staff is working to prepare a cost estimate for the proposed work and I should be able to provide an update during the March 5, 2008 Transportation/Waste Committee meeting.

I wish to thank you for your recommendation and look forward to providing you with a status on March 5th.

E. Frank Di Sanza
Federal Project Director
Waste Management Project
