

Description of Alternatives

The Site-Wide Environmental Impact Statement (EIS) will identify and evaluate potential environmental impacts of four initial alternatives for managing DOE/NNSA activities at the Nevada Test Site, and its off-site locations in Nevada

No Action Alternative

Continue current operations which are conducted under the existing EIS Record of Decision

Reduced Operations

Overall reduction in the level of operations and closure of some facilities

Expanded Operations

Increase in reasonably foreseeable new work in the areas of National Security, Environmental Management and Non-Defense Programs

Renewable Energy Operations

Renewable energy research and development and the potential deployment of these technologies on the Nevada Test Site
