

# Public Involvement

## Your Role in the Development of the Site-Wide Environmental Impact Statement

### *Your Role in the Scoping Process*

- Provide input on the development of alternatives
- Provide input related to potential impacts and issues both on and off the Nevada Test Site
- Provide input to ensure a comprehensive Draft Site-Wide Environmental Impact Statement is developed

### *Things to Think About*

- The Site-Wide Environmental Impact Statement will cover a 10-year time period
- Are there other alternatives
- What impacts to land, air, water, people, economic, biological, cultural or other areas should be considered
- Are the uses currently identified appropriate
- Are there other potential uses
